

FortiToken Installation Guide for iPhone

You need a FortiToken activations QR code to follow this guide

→ Install on iPhone

1. Open App store  and search for **"Fortitoken Mobile"**

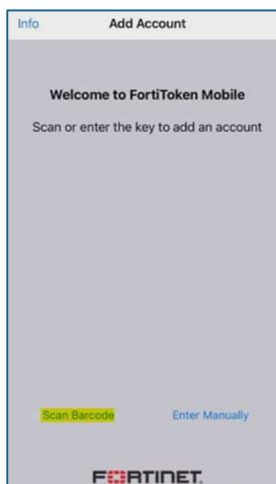

Install the appen as shown on the picture

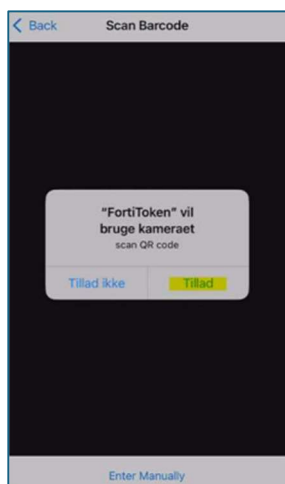

2. Open the app when it is ready
3. Select if you want notifications from the app
4. Now you are ready to set up the Token. The setup can be done in two different ways

→ Scan the QR code

1. Click **"Scan Barcode"**

2. Let the app use the camera

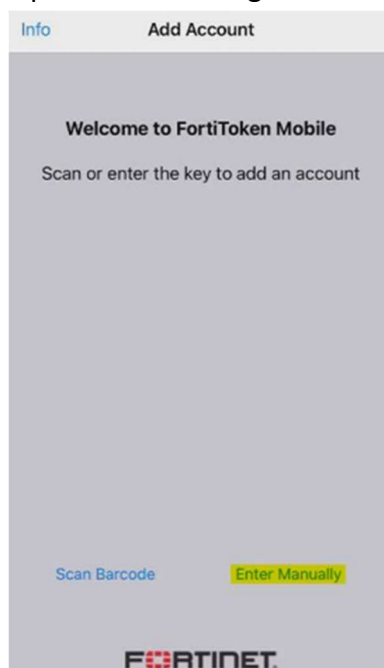

3. Find the activation mail. Attached you'll find the QR code
4. Scan the QR code with the app.
5. Once the code has been entered you will see 6 digits on the screen. If you see 6 dashed instead, you can click the eye icon to reveal the code. A new code is generated every minute

→ [Setup via manual entry](#)

If you experience problems with the qr code scanner, you can follow the steps below to enter the details manually.

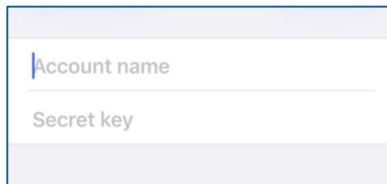

1. Open FortiToken og click **"Enter Manually"**

2. Write your ident as **"Account name"**

Enter the **Activation Code** as the **"Secret Key"**

Click on "Add account"

A screenshot of a web form with two input fields. The first field is labeled "Account name" and the second field is labeled "Secret key". Both fields are empty and have a light blue border. The form is set against a light gray background.

3. Once the code has been entered you will see 6 digits on the screen. If you see 6 dashes instead, you can click the eye icon to reveal the code. A new code is generated every minute
