Developments in Denmark's total external trade

Increasing foreign trade

There was a sharp fall in Denmark's total exports and imports in 2009 due to the global financial crisis and the subsequent economic slowdown. In 2011 Danish exports had reverted to the same level as that of 2008, for imports that was the case in 2013.

Large external surplus

Since 1987, Denmark's total exports of goods and services have exceeded total imports and thereby resulting in surplus on the balance of goods and services over the entire period. The development in imports and exports after 2008 resulted in a record high trade balance in 2010. In 2011 and 2012 the surplus on the balance of goods and services dropped to app. DKK 100 billion to rise again in 2013. In 2014 the surplus was DKK 101.3 billion.

www.statbank.dk/bet3 and bb2

For definitional reasons, the statistics on external trade in goods and external trade in services cannot be directly aggregated, and consequently the concept of goods from the balance of payments statistics is used in the above figure. In table 335 the transition from the concept of goods used in the external trade statistics to the concept of goods used in the balance of payments statistics can be seen. Adjustments are made e.g. with respect to bunkering and provisioning abroad, repairs and freight.

Sharp increase in trade in services

During most of the 1990s, the pace of the development in trade in goods and services was the same, but from the late 1990s the importance of trade in services to Denmark's external trade has increased and in 2014 trade in services was about 5 times higher than in 1994, while trade in goods was a good two times higher.

In 2009 trade in both goods and services was falling due to the global financial crisis, but already in 2010 trade was increasing again - in 2014 only imports of goods have not reverted to the level before the crisis.

Figure 2 Development in the foreign trade, current prices

External trade in goods

External trade more than doubled since 1994

In 2014, external trade in goods was more than twice as high as in 1994. Exports increased from DKK 273.2 billion in 1994 to DKK 615.0 billion in 2014. Imports increased from DKK 231.8 billion to DKK 555.1 billion in the same period.

Figure 3 External trade in goods

www.statbank.dk/uhv7

External trade surplus for 28 years in a row

After the Second World War, Denmark's foreign trade can be characterised by two distinct periods. In the early period, Denmark constantly had deficits on the trade balance.

The recent period has been an era of constant surplus, starting with the year 1987. The trade balance is the difference between exports and imports of goods.

Between 1954 and 1986, the annual deficit on the trade balance averaged 4.3 per cent of gross domestic product (GDP). The average surplus in the recent period (including 2014) is 3.1 per cent of GDP.

From the early 1950s, imports and exports each accounted for roughly one-fourth of GDP. In recent years this share, particularly for exports, has risen to nearly one-third.

Figure 4 Balance of trade

Among the factors affecting developments is the two oil crises in the 1970s that resulted in soaring import prices.

Exports as a percentage of GDP rose steeply from the late 1970s until the mid-1980s. Since 1987 exports have had a larger share of GDP than imports – a development that has made a positive contribution to GDP growth.

During the international financial crisis in 2008 and 2009, both imports and exports dropped sharply, so the trade balance surplus was preserved.

Figure 5 Imports and exports

http://www.statbank.dk/nahl2, sitc5r3y and sitc5r4y

Denmark's neighbours are our largest trading partners

Denmark's largest trading partners are those geographically close to Denmark. In 2014, the other 27 EU countries accounted for 66 per cent of the total Danish external trade and Norway another 6 per cent.

Countries of export and import

Denmark's external trade is concentrated on a few dominant trading partners. The 10 largest export markets accounted for 68 per cent of total Danish exports in 2014, while 10 countries supplied 71 per cent of total imports into Denmark.

Germany is Denmark's largest trading partner. In 2014, Germany accounted for 21 per cent of Denmark's imports and 18 per cent of Denmark's exports. 10 years earlier the corresponding figures were 22 per cent and 18 per cent.

www.statbank.dk/sitc2r3y and sitc2r4y

In recent years, China has been the fastest climber on the list of major trading partners. In 2014, China was the fourth largest supplier of goods to Denmark, accounting for 7 per cent of all Danish imports.

Trade is not quite so brisk in the opposite direction. Roughly 4 per cent of Danish exports go to China, a fact which puts China in the 8th place among Denmark's export markets.

Exports are dominated by food, crude materials and industrial products

Denmark's exports of goods consist mainly of a wide range of industrial products, food and crude materials like oil and mink skins. The most important products with regard to exports of industrial products are pharmaceuticals and machinery, but also clothes, furniture and food products are of high importance. Imports of goods are dominated by oil, goods for consumption and goods for use in the manufacturing industry and other industries.

Figure 6

www.statbank.dk/sitc2r4y

Manufactured goods and machinery dominate exports

Since 1989 food products' share of the total export has declined from 27 per cent to 19 per cent In the same period the share of chemical products has almost doubled to now account for 19 per cent of the export. Export of manufactured goods has dropped slightly from 27 per cent in 1989 to now account for 24 per cent of the export. Export share of machinery has been reasonably stable accounting for around 26 per cent of the export in the same period. The share of other goods, primarily fuel and crude materials, has in the same period risen from 11 per cent to 13 per cent.

Machinery accounts for almost one third of total imports

Since 1989, the share of the different commodity groups has been fairly stable. However the share of manufactured goods has declined from 32 per cent to 29 per cent today, while the share of other goods has increased from 12 per cent to 14 per cent The share of machinery was roughly the same as in 1989, around 31 per cent, but topped in 2002 with 38 per cent of total import.

Figure 8 Exports and imports analysed by commodity categories

Denmark is a net importer of oil in 2014

Until the first oil crisis in 1973, imports of crude oil and oil-based products accounted for around 10 per cent of total imports. Then an increase in oil prices pushed the value ratio up to around 20 per cent until the mid-1980s.

Subsequently, the value of imports of crude oil and oil-based products has fallen, so that these goods now account for about 8 per cent of total imports. Oil exports, on the other hand, increased sharply from 1997 to 2004, after which they have dropped substantially.

In 2014, exports of crude oil and oil-based products accounted for 6 per cent of total exports. In 2014 Denmark was a net importer of oil for the first time since 1998. Focusing exclusively on crude oil the exported volume is now 22 per cent. larger than the imported.

Figure 9 Exports and imports of crude oil

Million tonnes Exports Imports

www.statbank.dk/sitc5r3y og sitc5r4y

Import and export quantities on the rise

In terms of volume (quantities), Danish imports and exports increased quite steeply until 2007 – the only exception being a slight decline in 2003. In 2008, both import and export volumes dropped slightly, while 2009 was characterised by a major decline of historical scale.

In 2014 the import volumes went up 2 pct. and export volumes were also up 2 per cent on the year before.

Figure 10 Quantity index of imports and exports

www.statbank.dk/konj42 and bec42

Export prices has decreased more than import prices in 2014

Prices of imported and exported goods have moved largely in parallel – a development illustrated by the unit value indices and the terms of trade. Prices of imports as well as exports followed the same increase until 2008, and they both decreased steeply in 2009. Since 2009 the export prices have increased more than the import prices.

Figure 11 Unit values for imports and exports and terms of trade

The development in the import and export prices up to 2009 means that Denmark's terms of trade (i.e., the ratio of the export unit value index to the import unit value index) remained fairly constant. From 2009 the terms of trade experienced an increase caused by the prices for exports increasing more than the prices for imports.

index) remained fairly constant. From 2009 the terms of trade experienced an increase caused by the prices for exports increasing more than the prices for imports. In 2014 there was a decrease in terms of trade caused by prices for exports decreasing more than the prices for imports.

External trade in services

Trade in services has increased sharply during the last 20 years

During the period 1994 to 2014, external trade in services increased fivefold - in 2014 exports amounted to DKK 406.5 billion and imports to DKK 359.6 billion. This increase was primarily accounted for by sea transport, but also other types of transport, provision of goods and consultancy services contributed to this increase.

Figure 12 External trade in services

In 2009 exports as well as imports declined considerably in connection with the global financial crisis, but trade has now exceeded the level from before the crisis.

Large surplus on the trade in services

From 1999 to 2008 the surplus increased from DKK 14.2 billion to DKK 40.7 billion. Primarily, this increase was accounted for by transport services. The global financial crisis caused a sharp reduction in the Danish trade in services, and particularly exports accounted for a sharp fall, which caused a falling surplus on the balance of services amounting to DKK 14.7 billion in 2009. Transport services accounted for the largest fall, where particularly sea transport experienced a considerable fall. After 2009 exports increased more than imports, resulting in large surpluses on the balance of services, which reached DKK 46.9 billion in 2014.

Denmark's largest trading partners

Compared to 2005 the market shares for Denmark's traditional export markets, e.g. Sweden, Germany and UK have declined in 2014, while exports to China, Norway, Switzerland and have seen an increase. In the same period USA reduced their import share, whereas Sweden, France and China have increased their share of Danish imports.

Top 10 export markets and import countries

www.statbank.dk/uht02

The United States is Denmark's largest export market

The United States was Denmark's most important trading partner in both 2005 and 2014 with regard to exports, which was mainly due to purchases of services within sea transport by American customers. The circumstance that the USA widely accounts for sea transport services does not necessarily reflect that the physical sea transport takes place to and from the USA. The essence of the statistics on trade in services is that the Danish shipping companies carry goods on behalf of American customers.

Germany has surpassed the United States and was Denmark's most important trading partner with regard to imports. This is mainly because the United States' share of the Danish imports declined from 14 per cent in 2005 to 11 per cent in 2014. Sea transport is also important in relation to Germany, but also travel and road transport play a very important role in Danish imports of services from Germany.

Besides the United States, Germany and Sweden are Denmark's most important trading partners with regard to trade in services. For Germany and Sweden sea transport also plays a considerable role, but trade with these two countries also covers a wide range of services, e.g. air and road transport, travels and other business services. It can generally be concluded that if sea transport is disregarded, markets geographically close to Denmark are most important for Denmark's trade in services - which is also precisely the case with regard to trade in goods.

Sea transport covers 45 per cent of Denmark's trade in services

Sea transport is, by far, Denmark's most important trading activity with regard to services. In 2014, this service group accounted for 50 per cent of Denmark's exports of services and 39 per cent of Denmark's imports of services.

www.statbank.dk/uht02

With regard to imports, the group *other business services* is also the second-largest service group. The group covers particularly imports of *Professional and management consulting services, architectural and engineering services* and *research and development services*, but also substantial imports of operational leasing, e.g. ships hired without a crew. Travel is the third-largest service group for both imports and exports. Travel covers the expenditure incurred by Danes in connection with especially holidays and business trips abroad, but also trips abroad in connection with health care and education are included.

Balance of payments

Surplus on the balance of payments since 1999

For many years, Denmark had a continuous deficit on the balance of payments, which gave rise to increasing foreign debt. However, since 1990 Denmark has – except for 1998 – had a surplus on the balance of payments current account, which contributed to an increase in Denmark's foreign assets. From having a net foreign debt of more than 30 per cent of GDP at the beginning of the 1990s, Denmark had positive net assets abroad of 48 per cent of GDP¹ in 2014.

Denmark's net wealth, or net assets, is affected partly by the surplus on the balance of payments current account and partly by value adjustments. For example changes in the exchange rate will affect the value of the net assets. This gave rise to e.g. foreign debt again from 2006 to 2008, despite surplus on the balance of payments.

Surplus is attributed to trade in goods and services and investment income

In 2014, the surplus on the balance of payments current account was DKK 118.6 billion and was comprised of a surplus on trade in goods and services of DKK 101.3 billion and a surplus on income (investment income and compensation of employees) of DKK 55.7 billion, while current transfers, consisting of e.g. foreign aid and transfers from and to EU institutions, contributed negatively with DKK 38.3 billion.

Investment income consist of e.g. interest payments and dividends from securities – shares, bonds, and other equity instruments – issued abroad and held by Danish residents, and similar payments from securities issued in Denmark held by non-residents. In case of foreign direct investments reinvested earnings are also included in investment income. The investment income alone contributed with a surplus of DKK 61.1 billion for 2014.

| Tabl | e 335 Major imported commodities | | |
|--------|---|-------------------------|-------------|
| | | 2013 | 2014* |
| | | DKK thousa | ands ——— |
| | Imports, total | 542 044 532 | 555 073 349 |
| 1 | Medicaments consisting of mixed or unmixed products for therapeutic or prophylactic purposes, put up in measured doses "incl. those in the form of transdermal administration" or in forms or packings for retail sale (excl. medicaments containing antibiotics, medicaments containing hormones or steroids used as hormones, but not containing antibiotics, medicaments containing alkaloids or derivatives thereof but not containing hormones or antibiotics and medicaments containing provitamins, vitamins or derivatives thereof used as vitamins) | 12 888 121 | 14 228 822 |
| 2 | Sea-going vessels for the transport of goods and seagoing vessels for the transport of both persons and goods (excl. refrigerated vessels, tankers, ferry-boats and vessels principally designed for the transport of persons) | 6 389 840 | 10 581 605 |
| 3 | of persons) Patroloum ails and ails obtained from bitumingus minorals, crude (avel, natural gas condensates) | 0 309 840 11 710 048 | 10 338 050 |
| 3 4 | Petroleum oils and oils obtained from bituminous minerals, crude (excl. natural gas condensates) Gas oils of petroleum or bituminous minerals, with a sulphur content of <= 0,001% by weight (excl. | 11710040 | 10 330 050 |
| 4 | containing biodiesel, and for undergoing chemical transformation) | 9 048 475 | 8 518 798 |
| 5 | Motor cars and other motor vehicles, principally designed for the transport of persons, incl. station wagons, with compression-ignition internal combustion piston engine "diesel or semi-diesel engine" of a cylinder capacity > 1.500 cm ³ but <= 2.500 cm ³ , new (excl. motor caravans and vehicles specially designed for travelling on snow and other special purpose vehicles of subheading 8703.10) | 5 450 282 | 6 234 107 |
| 6 | Telephones for cellular networks "mobile telephones" or for other wireless networks | 5 969 666 | 6 212 116 |
| 7 | Data-processing machines, automatic, portable, weighing <= 10 kg, consisting of at least a central | | |
| 8 | processing unit, a keyboard and a display (excl. peripheral units) Motor cars and other motor vehicles principally designed for the transport of persons, incl. station wagons and racing cars, with spark-ignition internal combustion reciprocating piston engine, of a cylinder capacity > 1.000 cm ³ but <= 1.500 cm ³ , new (excl. those of heading 8702 and vehicles for the | 4 890 736 | 5 191 614 |
| 9 | transport of persons on snow and similar vehicles of subheading 8703.10) Oilcake and other solid residues, whether or not ground or in the form of pellets, resulting from the | 4 397 071 | 4 847 500 |
| | extraction of soya-bean oil | 4 606 518 | 4 786 841 |
| 10 | Jet fuel, kerosene type | 5 678 409 | 4 400 784 |
| 11 | Natural gas condensates | 8 391 083 | 4 164 017 |
| 12 | Machines for the reception, conversion and transmission or regeneration of voice, images or other data, incl. switching and routing apparatus (excl. telephone sets, telephones for cellular networks or for other wireless networks) | 3 063 865 | 3 982 848 |
| 13 | Motor cars and other motor vehicles principally designed for the transport of 1 to 9 persons, incl. station wagons and racing cars, with spark-ignition internal combustion reciprocating piston engine, of a cylinder capacity > 1.500 cm ³ but <= 3.000 cm ³ , new (excl. those of subheading 8703 10 and motor | | |
| | caravans) | 3 343 960 | 3 808 028 |
| 14 | Raw furskins of mink, whole, with or without heads, tails or paws | 2 409 938 | 3 301 939 |
| 15 | Aeroplanes and other powered aircraft of an of an unladen weight > 15.000 kg (excl. helicopters and dirigibles) | 1 410 966 | 3 242 484 |
| 16 | Gear boxes for machinery | 2 002 422 | 2 841 785 |
| 17 | Fresh or chilled bovine meat, boneless | 2 520 998 | 2 692 926 |
| 18 | Fuel oils obtained from bituminous materials, with a sulphur content of > 0,1% but <= 1% by weight (excl. for undergoing chemical transformation, and containing biodiesel) | 1 461 887 | 2 640 493 |
| 19 | Gas oils of petroleum or bituminous minerals, with a sulphur content of > 0,002% but <= 0,1% by weight (excl. containing biodiesel, and for undergoing chemical transformation) | 2 781 431 | 2 589 975 |
| 20 | Motor vehicles for the transport of goods, with compression-ignition internal combustion piston engine "diesel or semi-diesel engine" of a gross vehicle weight <= 5 t, of a cylinder capacity <= 2.500 cm ³ , new (excl. dumpers for off-highway use of subheading 8704.10, special purpose motor vehicles of heading 8705 and special motor vehicles for the transport of highly radioactive materials) | 1 896 761 | 2 504 541 |
| 21 | Electrical energy | 2 751 647 | 2 449 308 |
| 22 | Fresh or chilled Atlantic salmon "Salmo salar" and Danube salmon "Hucho hucho" | 1 804 245 | 2 445 000 |
| 23 | Wood pellets | 2 385 112 | 2 202 088 |
| 24 | Articles of plastics and articles of other materials of heading 3901 to 3914, n.e.s. | 2 004 677 | 2 123 359 |
| 25 | Sea-going tankers | 1 039 717 | 2 045 586 |

Note 1: Please note that data on some commodity items are withheld for reasons of statistical confidentiality, and the list should be used subject to caution.

Note 2: Please note that the international grouping of commodities are slightly changed year by year, i.e. that some commodity groups are combined and others are split up. Consequently, the ranking of the commodities can be changed exclusively as a consequence of changes in the grouping of commodities.

| 6 | Enzymes and prepared enzymes, n.e.s. (excl. rennet and concentrates thereof, lipoprotein lipase and Aspergillus alkaline protease) | 6 284 224 | 6 744 018 |
| 7 | Gas oils of petroleum or bituminous minerals, with a sulphur content of <= 0,001% by weight (excl. containing biodiesel, and for undergoing chemical transformation) | 7 188 374 | 6 429 334 |
| 8 | Frozen boneless meat of domestic swine (excl. bellies and cuts thereof) | 5 999 365 | 5 874 168 |
| 9 | Parts of non-electrical engines and motors, n.e.s. | 3 386 613 | 5 851 218 |
| 10 | Fuel oils obtained from bituminous materials, with a sulphur content of > 0,1% but <= 1% by weight (excl. for undergoing chemical transformation, and containing biodiesel) | 6 264 497 | 5 553 550 |
| 11 | Food preparations, n.e.s., containing, by weight, >= 1,5% milkfat, >= 5% sucrose or isoglucose, >= 5% glucose or >= 5% starch | 6 037 516 | 5 383 452 |
| 12 | Domestic swine, weighing < 50 kg (excl. pure-bred for breeding) | 4 678 032 | 4 971 598 |
| 13 | Fresh or chilled with bone in, domestic swine hams and cuts thereof | 4 888 881 | 4 756 731 |
| 14 | Motor spirit, with a lead content <= 0,013 g/l, with a research octane number "RON" of < 95 (excl. containing biodiesel) | 4 594 871 | 3 592 719 |
| 15 | Hearing aids (excl. parts and accessories) | 3 595 687 | 3 386 761 |
| 16 | Towers and lattice masts, of iron or steel | 4 509 803 | 3 195 091 |
| 17 | Fresh cheese "unripened or uncured cheese", incl. whey cheese and curd of a fat content, by weight, of $<=40\%$ | 2 836 013 | 2 968 466 |
| 18 | Gears and gearing, for machinery (excl. friction gears, spur, helical, bevel, bevel-spur gears and gearing and worm gear, gear boxes and other speed changers) | 1 818 376 | 2 855 912 |
| 19 | Parts of pumps for liquids, n.e.s. | 2 591 081 | 2 707 769 |
| 20 | Structures and parts of structures of iron or steel, n.e.s. (excl. bridges and bridge-sections; towers; lattice masts; doors, windows and their frames and thresholds; equipment for scaffolding, shuttering, propping or pit-propping, and products made principally of sheet) | 2 361 310 | 2 589 589 |
| 21 | Light oils and preparations, of petroleum or bituminous minerals, n.e.s. (excl. containing biodiesel, for undergoing chemical transformation, and special spirits, motor spirit and spirit type jet fuel) | 1 960 869 | 2 556 363 |
| 22 | Waste and scrap of iron or steel, not fragmentised "shredded", not in bundles (excl. slag, scale and other waste of the production of iron and steel; radioactive waste and scrap; fragments of pigs, blocks or other primary forms of pig iron or spiegeleisen; waste and scrap of cast iron, alloy steel or tinned iron or steel; turnings, shavings, chips, milling waste, sawdust, filings, trimmings and stampings; waste and scrap of primary cells, primary batteries and electric accumulators) | 1 541 874 | 2 513 133 |
| 23 | Fresh or chilled boneless meat of domestic swine (excl. bellies and cuts thereof) | 2 944 578 | 2 513 133 |
| 23 24 | | 2 944 010 | Z 009 084 |
| 24 | Inverters having power handling capacity > 7,5 kVA (excl. of a kind used with telecommunication apparatus, automatic data-processing machines and units thereof) | 3 043 265 | 2 431 878 |
| 25 | Articles of plastics and articles of other materials of heading 3901 to 3914, n.e.s. | 2 374 098 | 2 336 829 |

ity, and the list should be used subject to caution.

Note 2: Please note that the international grouping of commodities are slightly changed year by year, i.e. that some commodity groups are combined and others are split up. Consequently, the ranking of the commodities can be changed exclusively as a consequence of changes in the grouping of commodities.
