# Preface

---

The purpose of the Statistical ten-year review is to present comparable annual statistics which can illustrate developments in society over the past ten years. The ten-year review is organised so that it is well-suited for use in teaching.

This year the ten-year review starts with a feature article which provides a statistical examination of the issue of taxes and tax burden. The article was written by Carsten Petersen, Senior Adviser, and Bjarne G. Johansson, Head of Section.

We always welcome any comments or suggestions as to how the ten-year review could be improved. E-mail: [bj@dst.dk](mailto:bj@dst.dk).

The tables in the Statistical ten-year review were compiled by the divisions at Statistics Denmark which cover the subjects concerned. Bo Johansen, Head of Section, was in charge of editing with the assistance of Claus Østberg.

Any corrections to the tables in the ten-year review will be available on our website at: [www.dst.dk/tiaar](http://www.dst.dk/tiaar).
